Continuation of 4(e) Other: There are several improper amendment markings or the lack thereof for claims 20, 22, 24, and 28 which makes the record unclear from the previous claim set, filed 9/8/06. For example, a comma in claim 20 (line 9) has been added without underlining it. The semicolon in claim 20 (line 13) was underlined even though it was already present in the previous claim set. In claim 20 (line 18), "protein" is missing an "s" at the end which was present in the previous claim set. In claim 20 (line 19), "of" is deleted although it was not present in the previous claim set. In claim 20 (last line), step (e) has been newly added without proper underlining amendment markings. In claims 22 and 24, a dash is missing between the words "sequence" and "based" that was present in the previous claim set. Claim 28 contains the status identifier "currently amended" although there are no amendment markings in this claim. It is noted that "identified in step (d)" has been added to claim 28 without proper underlining amendment markings. Clarification of these issues is requested so that the record may remain clear.
